

James D. Albert, M.D., RPVI, is the Founder and Medical Director of the Albert Vein Institute, the premier outpatient center in Colorado with state-of-the-art diagnosis and treatment for all aspects of venous disease. Specialized treatment is offered for both medical and cosmetic vein issues, including varicose and spider veins.

Doctor Albert is one of only 500 diplomats nationwide, who is Board Certified in Phlebology, the study of veins. Dr. Albert is also Board Certified in Cardiovascular Surgery, having spent 14 years as a Cardiovascular and Thoracic Surgeon and as the Chief of Cardiac Surgery at Memorial Hospital from 1998—2005. This gives him the distinction of being among a select few Double Board-Certified physicians in Colorado. Dr. Albert received his medical degree from the University of Pennsylvania and trained in General Surgery at New York Hospital - Cornell Medical College and Cardiovascular Surgery at the University of Colorado.

The Albert Vein Institute was established in 2006 as the field of Phlebology was, and still is, experiencing significant field-changing advancements. Having chosen to devote his practice to the quickly evolving knowledge, techniques and equipment of Phlebology, Dr. Albert is able to track and utilize state-of-the-art treatments and procedures on a day-to-day basis.

As an example, the Albert Vein Institute is the only vein practice in Colorado that employs the innovative Transcranial Doppler (TCD), which uses sound waves to measure blood flow through the brain. The TCD is important because it lets Dr. Albert determine the type of sclerotherapy—treatment for problem veins—that is the safest and most effective for each patient.

The Albert Vein Institute also offers such advanced techniques and equipment as the CoolTouch CTEV™1320 laser, and the Venefit™ Radiofrequency Closure Technology which allows Dr. Albert the maximum amount of flexibility to treat each patient as their condition warrants.

More than 6,000 Endovenous Ablation procedures have been performed since 2006 at the Albert Vein Institute in Colorado Springs and our new 10,000 sq. ft. facility in Denver, safely helping patients look and feel better.
